

Alternative Petroleum Technologies Renews Multiple Year Contract for Use of Its Diesel Emulsion in a Major European Port

PR Newswire | 13 May 2010 | 05:08 PM ET

LUXEMBOURG, May 13, 2010 /PRNewswire via COMTEX/ -- Alternative Petroleum Technologies S.A. ("APT") announced today that its partner ITI S.r.l. ("ITI") in Genoa, re-signed its customer Ignazio Messina & C. S.p.A. ("Messina") to a four-year contract. The contract covers the daily use of an on-site emulsification plant that is used to fuel their vehicles and port equipment running 24 hours per day. The Messina Terminal has been using this emulsion technology for the last several years.

The Messina Terminal located in the Old Port is home to a fleet of container ships which sails all over the Mediterranean, Africa, the Middle East and the Indian subcontinent. The fleet of 16 vessels sail to over 50 ports and 36 countries.

Alberto Vigliotti, President of ITI said he was "pleased to have the port customer committed to a four year contract and believes this is a reflection of the trouble-free performance in delivering emission reductions and cost savings." Patrick Grimes, APT President stated, "Messina's renewal under a multiple year contract provides APT with marketing momentum in Italy and commercial and technical validity for our upcoming contract with the Port of Los Angeles." About Alternative Petroleum Technologies (www.altpetrol.com) Alternative Petroleum Technologies S.A. is the holding company for a group of environmental technology companies dedicated to all aspects of cost-effective solutions to environmental problems. We offer technologies and expertise to help operators of compression-ignition engines and industrial boilers meet increasingly stringent emissions requirements. We are developing new ways to help international power plant operators meet the constantly growing demand for electricity with heavier oil products that are made cleaner and more economical.

And we are meeting the challenge of providing even cleaner biodiesel fuels with new generations of emulsified fuels.
